DETAILED ACTION

Allowable Subject Matter

1. Claims 11-19 and 27-32 are allowed.
2. The following is an examiner's statement of reasons for allowance: None of the cited prior art teaches a machine load metering and management system that includes a plurality of sensors associated with one or more machines; and a programming logic controller (PLC) that collects data captured by the plurality of sensors and determines and regulates the power to be distributed to one or more machines based at least in part upon metered data generated by a waveform analyzer component utilizing the data captured by the plurality of sensors, as shown in claim 11. Particularly, as shown in Applicant's reply, received 9 August 2006, neither Forth et al. nor Wilson et al. teach using data generated by a waveform analyzer in a PLC.

None of the cited prior art teaches a method for monitoring and managing loads that includes, retrieving load data from one or more sensing devices; deriving energy data using a microprocessor located on a printed circuit board inserted in a slot on a backplane and the load data received from the sensing devices; determining a load control strategy based at least in part on the derived energy data; and controlling loads according to the control strategy, as shown in claim 27. Particularly, neither, Woolard et al., Schienbein et al. nor Holle et al. teach deriving energy data using a microprocessor located on a printed circuit board inserted in a slot on a backplane.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
